

MAY

MOTHER EARTH - TREAT MOM RIGHT

- Mow high at 3 or 4 inches and let clippings lie on the lawn. Save money, time, and prevent over application of nutrients by letting the grass clippings add nitrogen to the soil as nature's fertilizer.
- Don't mulch or compost clippings with annual weed seed heads. Instead, bag it up and dispose of in the trash to prevent more weeds being introduced to your lawn.
- Continue to hand pull or spot treat weeds with an organic weed control spray.
- If Japanese beetle grubs are an issue and soil conditions are right, apply Milky Spore to control the population. One application lasts for 10 years.
- Reduce or eliminate pesticides to protect children and animals.

**DID YOU
KNOW?**

Beneficial nematodes do more than control grubs? They are also effective on flea and tick larvae, helping keep your pets free of these pests.
